

The background of the slide features a large, light blue watermark of the Microsoft Sentinel logo, which is a shield with a stylized 'S' inside.

DATA CONNECTORS IN MICROSOFT SENTINEL

1. Integration of Threat Intelligence into Microsoft Sentinel

The screenshot shows the Microsoft Sentinel Content Hub interface. The top navigation bar includes the Microsoft Azure logo, a search bar, and the Copilot icon. The main header displays 'Microsoft Sentinel | Content hub' with a search bar and filters. The left sidebar shows the 'Content management' section with options for 'General', 'Threat management', and 'Content management'. The main content area displays a list of solutions, including 'Threat Intelligence' (Microsoft), 'Microsoft Defender Threat Intelligence' (Microsoft), 'Threat Intelligence (NEW)' (Microsoft), 'Lumina Threat Intelligence' (Cognite Techn...), 'Google Threat Intelligence' (Google), 'Intel 471 Threat Intelligence' (Intel 471), and 'ThreatConnect' (ThreatConnect, Inc.). The 'Threat Intelligence' solution is highlighted, showing its status as 'In progress' and its content source as 'Microsoft'. The right sidebar provides details for the 'Threat Intelligence' solution, including its description, data connectors, workbooks, analytic rules, and hunting queries.

The screenshot shows the 'Threat Intelligence' solution details page. The top navigation bar includes the Microsoft Azure logo, a search bar, and the Copilot icon. The main header displays 'Threat Intelligence' with a search bar and filters. The left sidebar shows the 'Content management' section with options for 'General', 'Threat management', and 'Content management'. The main content area displays a list of content items, including 'Threat Intelligence - TAXII' (Microsoft), 'Threat Intelligence Platforms' (Microsoft), 'Threat Intelligence Upload API (Preview)' (Microsoft), 'Preview - TI map Domain entity to Cloud App Events' (Microsoft), 'Preview - TI map Email entity to Cloud App Events' (Microsoft), 'Preview - TI map File Hash entity to Cloud App Events' (Microsoft), 'Preview - TI map IP entity to Cloud App Events' (Microsoft), 'Preview - TI map URL entity to Cloud App Events' (Microsoft), 'TI Map Domain Entity to DeviceNetworkEvents' (Microsoft), 'TI map Domain entity to Dns Events (ASIM DNS Schema)' (Microsoft), 'TI map Domain entity to DnsEvents' (Microsoft), 'TI map Domain entity to EmailEvents' (Microsoft), and 'TI map Domain entity to EmailUrlInfo' (Microsoft). The 'Threat Intelligence - TAXII' item is highlighted, showing its status as 'Disconnected' and its content source as 'Microsoft'. The right sidebar provides details for the 'Threat Intelligence - TAXII' solution, including its description, data connectors, workbooks, analytic rules, and hunting queries.

Windows Security Events

Microsoft Provider Microsoft Support 3.0.9 Version

Description

Note: Please refer to the following before installing the solution:

- Review the solution [Release Notes](#)

The Windows Security Events solution for Microsoft Sentinel allows you to ingest Security events from your Windows machines using the Windows Agent into Microsoft Sentinel. This solution includes two (2) data connectors to help ingest the logs.

- Windows Security Events via AMA** - This data connector helps in ingesting Security Events logs into your Log Analytics Workspace using the new Azure Monitor Agent. Learn more about ingesting using the new Azure Monitor Agent [here](#). **Microsoft recommends using this Data Connector.**
- Security Events via Legacy Agent** - This data connector helps in ingesting Security Events logs into your Log Analytics Workspace using the legacy Log Analytics agent.

NOTE: Microsoft recommends installation of Windows Security Events via AMA Connector. Legacy connector uses the Log Analytics agent which is about to be deprecated by **Aug 31, 2024**, and thus should only be installed where AMA is not supported.

Windows Security Events via AMA

Disconnected Status

Microsoft Provider

-- Last Log Received

Description

You can stream all security events from the Windows machines connected to your Microsoft Sentinel workspace using the Windows agent. This connection enables you to view dashboards, create custom alerts, and improve investigation. This gives you more insight into your organization's network and improves your security operation capabilities. For more information, see the [Microsoft Sentinel documentation](#).
