3.1.2 Version

Description

Note: Please refer to the following before installing the solution:

- Review the solution [Release Notes](#)

The Threat Intelligence solution contains data connectors for import of threat indicators into Microsoft Sentinel, analytic rules for matching TI data with event data, workbook, and hunting queries. Threat indicators can be malicious IP's, URL's, filehashes, domains, email addresses etc.

Data Connectors: 5, Workbooks: 1, Analytic Rules: 52, Hunting Queries: 5

Prerequisites

To integrate with Microsoft Defender Threat Intelligence make sure you have:

Workspace: read and write permissions.

Configuration

Use this data connector to import Indicators of Compromise (IOCs) from Microsoft Defender Threat Intelligence (MDTI) into Microsoft Sentinel.

Import indicators:
At most one week old

Recommended log sources for matching:
Amazon Web Services
Microsoft Entra ID
Azure Activity
VPN
Azure Firewall
Barracuda Web Application Firewall
Azure Web Application Firewall (WAF)
Windows DNS via Legacy Agent
Microsoft 365 (formerly, Office 365)
